

## Who We Are

At Seven Seas Technologies (SST) we are committed to transforming lives and changing communities. With a high entrepreneur focus and having been in business for 16 years, the award winning company has evolved from an infrastructure company to a full end to end business transformation company in the healthcare, homeland security and social services segments .

In our Healthcare segment we are simply orchestrating cutting-edge medical infrastructure and health information systems, through creative financial models to enable Africa to deliver predictive, preventive, personalized and innovative healthcare solutions.

SST is currently working closely with General Electric (GE) to modernize & upgrade radiology departments of 98 Level IV and Level V hospitals across Kenya with state-of-the-art radiology facilities. SST is also working on transformative oncology and laboratory diagnostic programs that focus on affordable, accessible and quality healthcare delivery.

Additionally, SST will also deploy and manage fully self-contained, customizable container clinics, which will be positioned as a triage service and primary healthcare provider throughout Kenya.

## Bridging the Gap

As a corporate innovative leader, SST is evolving with Kenya's changing healthcare needs. We believe that SMEs can harness ICT and innovative healthcare solutions to address healthcare challenges that drive upward social mobility and economic growth for Kenyan citizens. Targeted healthcare sector investments will create opportunities for SMEs, and SST is at the forefront of addressing the missing middle challenge to ensure scalable innovation happens at all levels.

Through a SME scale-up strategy, SST will support innovative local start-ups and entrepreneurs who are developing or looking to develop pioneering healthcare solutions through our new Afya Labs programs, Kabla and Takeoff.

# SST Afya Labs

## SST Kabla

SST Kabla is a talent incubator designed to support budding founders start and scale a business in Kenya's healthcare ecosystem. Kabla is targeting mid-career healthcare professionals most familiar with the sector's challenges and with proven success in health services delivery and a knack for leadership.

The individual will have an unfunded pre-idea for which Kabla will provide idea validation, a launch team, co-working space and a monthly stipend as the idea is incubated for monetization.

## SST Takeoff

SST Takeoff is geared towards empowering existing startups in the healthcare space who face the challenges of getting good ideas to scale due to limited access to partners, clients, suppliers and financing.

SST will provide access to our diverse network, technological support, concept refinement, strategy formulation, co-working space and funding.
